SUMMARY

Computer Science undergraduate with hands-on experience building AI agents, machine learning models and web applications. Built and deployed a production AI agent using Groq Llama 3.3 70B during a software development internship. Skilled in Python, Machine Learning, RAG, SQL and Next.js, with regular problem-solving practice on LeetCode. Seeking a Software Development or AI/ML internship.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | 2024 – 2028 (Expected)
Chhatrapati Shahu Ji Maharaj University (CSJMU), Kanpur, Uttar Pradesh | CGPA: 8.5/10 (up to 4th semester)

Class XII (CBSE) | Kendriya Vidyalaya PDDU Nagar, Uttar Pradesh | 90%

Class X (CBSE) | Kendriya Vidyalaya PDDU Nagar, Uttar Pradesh | 95%

TECHNICAL SKILLS

Languages: Python, C, JavaScript, SQL, HTML, CSS
AI/ML: Machine Learning, Retrieval-Augmented Generation (RAG), LLM Agents, Scikit-learn, Pandas, NumPy
Data Visualization: Matplotlib, Seaborn
Web: Next.js, Streamlit
Databases: MySQL
Tools: Git, GitHub, VS Code, Jupyter Notebook, Anaconda, MySQL Workbench, Google Antigravity, Claude, PyInstaller
Soft Skills: Communication, Event Management, Video Editing, Sketching, Technical Content Creation (YouTube)

EXPERIENCE

Software Development Intern | Coderva
- Built and deployed PG_Orchestrator, a production-ready autonomous AI agent for PG accommodation discovery and booking near UIET, CSJMU Kanpur.
- Powered the agent with Groq Llama 3.3 70B, using multi-step planning and conversation memory to handle end-to-end user interactions.
- Developed a custom JavaScript tool for real-time in-memory filtering by student preferences (budget, room type, food).
- Automated booking confirmation emails by integrating AWS SES into the agent's orchestration pipeline.

Data Science and Analytics Mentee | Pregrad | Jun 2025 – Sep 2025
- Completed a 3-month industry mentorship in Data Science and Analytics.
- Built industry projects on Credit Risk Modelling and Exploratory Data Analysis (EDA) of a housing dataset under mentor guidance.

Artificial Intelligence and Machine Learning Mentee | Pregrad | Jul 2025 – Nov 2025
- Completed a 3-month industry-level mentorship covering core AI and Machine Learning concepts.

PROJECTS

House Price Prediction Model | Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- Built a regression model to predict California housing prices using feature engineering and cross-validation.
- Achieved an R^2 score of 0.85 and identified median income as the strongest price predictor.

Movie Recommendation System | Python, Pandas, Scikit-learn, Streamlit, Pickle
- Built a content-based recommender that suggests 5 similar movies using text vectorization and cosine similarity on the TMDB 5000 dataset.
- Serialized the model with Pickle and deployed it end-to-end as an interactive Streamlit web app.

Student Performance Analyzer | Python, Pandas, NumPy, Matplotlib, Seaborn
- Processed Class 10–12 marks data to compute totals, rank top performers and calculate subject-wise averages.
- Produced visual reports highlighting academic trends and class-level strengths.

Robo Fly (2D Arcade Game) | Python, Pygame, PyInstaller
- Developed a Flappy Bird-style game with procedurally generated obstacles, gravity/velocity physics and real-time collision detection.
- Added sound, persistent high scores and packaged the game as a standalone executable with PyInstaller.

ACHIEVEMENTS AND CERTIFICATIONS

- **AI for Bharat Hackathon (AWS and Hack2skill), Jun 2026:** Built and submitted a qualified AI prototype using AWS generative AI tools.
- **PFRDA Hackathon, IIT Kanpur:** Participated as part of Team Pension Quest.
- **LeetCode:** Regularly solve data structures and algorithms problems.
- **HackShodh 2026, Jan 2026:** Participated in a 24-hour national hackathon at CSJMU, Kanpur.
- **Front-End Web Development Competition, CSJMU:** Award winner as part of Team Vayuu.
